

POLI SCI 490

R Workshop

2024-2025

Organizer: Gustavo Diaz

Email: gustavo.diaz@northwestern.edu

Time and Place: TBD

Office Hours: TBD

GitHub Repository: TBD

Overview

The R Workshop is a year-long series that meets three times per quarter during the academic year. The purpose of the workshop is to learn, practice, and update cutting edge statistical programming skills as they apply to quantitative and computational social science.

Most workshop meetings will feature an introduction to a new tool/method/approach and practice. Once per term, usually toward the end of the quarter, we will have an open-ended coding session in which you can work on any project that may benefit from the group setting, or we can use that time to collectively learn something new (e.g. incorporating generative AI into our coding workflow).

The workshop is open to everyone, but those formally enrolled will receive full credits by attending to every meeting. We will meet on TBD (unsure if there will be a pre-determined time or if we can arrange it on our own).

The aim is to present topics that are equally useful for new and advanced users. So if you see a topic that you are already confident on, chances are that you will still learn something new. The open-ended coding sessions are also a good instance to learn some intangible skills.

Schedule

Fall

Meeting 1: Writing papers in Quarto

Meeting 2: Presentations and posters

Meeting 3: Coding session

Winter

Meeting 4: Figures and data visualization (*guest: Gina Renolds – West Point*)

Meeting 5: Descriptive tables and model summaries (*guest: Vincent Arel-Bundock – Université de Montréal/ Andrew Heiss – Georgia State*)

Meeting 6: Coding session

Spring

Meeting 7: Text and images as data (*guest: Sirus Bouchat/Nora Webb-Williams – Illinois*)

Meeting 8: Declaring and diagnosing research designs (*guest: Alex Coppock – Yale/ Graeme Blair – UCLA*)

Meeting 9: Coding session

Details Subject to Change

Please note that the specifics of this workshop are subject to change in the case of unforeseen circumstances.
